AUTO BRACE 2™

The New innovation in vehicle stabilization. "Real World" design for "Real World" applications.

HJR Equipment products are developed by firefighters for firefighters. The AutoBrace-2 is designed to meet a wide variety of rescue situations rescue personnel see on a daily basis.

The AutoBrace-2's unique design allows one rescuer to completely stabilize a vehicle in seconds. This allows manpower to focus on patient care and extrication.

AutoBrace-2 can be used to stabilize:

- vehicle on its side
- vehicle on its roof
- vehicle against a tree or pole
- vehicle on top of another vehicle

AutoBrace-2 can be utilized in any configuration from 3'6" to 7'6". AutoBrace-2 is strong, rated for 2,000 lbs. with a 3:1 safety factor at any extension length.

As with all professional equipment, only qualified, trained personnel should use the equipment in accordance with the product manual and safe operating practices.

Product specifications and components are subject to change with out notice.
